

# Advanced Cardiac Life Support (ACLS)

- Initial Course Hours - 9
- Recertification Course Hours - 5
  
- Step by step video instruction
- Hands-on practice with instructor
- Skill enhancement in the treatment of arrest and pre-arrest patients through active participation in simulated cardiopulmonary patient cases
- Working in learning stations while practicing essential skills
- Group participation
- Designed for healthcare providers and medical responders, including EMS professionals, firefighters, hospital and other clinical personnel who direct or participate in the resuscitation of a patient, either in or out of hospital

## Scenario-based training enhances and reinforces important skills:

- Reinforcement of BLS CPR skills
- BLS primary survey
- ACLS secondary survey
- Effective resuscitative team dynamics
- How to effectively integrate CPR and AED usage during advanced level resuscitation, including medication administration
- Recognizing early signs of stroke and delivering appropriate patient care
- Proper usage of basic and advanced airway techniques such as endotracheal intubation and Combitube use
