

# Anatomy & Physiology for Paramedics

**This is an Online Course**

---

## Course Description

The Anatomy & Physiology for Paramedics course is specifically designed to introduce the fundamental terminology, structure, and function of the human body. The main emphasis of this course will focus on the major organ systems and their association with health and disease. In addition, students will gain a basic understanding of pathophysiology and the disease process as it applies to pre-hospital emergency care.

This course is specifically designed for students who are pursuing advanced level Paramedic training through Huron Valley Ambulance's EMS Education and may be taken as a cohort with the Basic EMT program. All students filing for application for the Paramedic course will be required to successfully complete this course with a grade of 78% or higher.

---

## Books:

Textbooks should be purchased directly from the F.A. Davis website, using the links below. In the "Promotion Code" area, please use code **X2JF7T5N** to receive 20% off your materials!!!
